INTRODUCTION

who we are

WELCOME to ARDICTECH

We are a highly experienced team, ready to share our experiences gained in technology development in the US, Europe, Far East, and Asia. We take pride in our successful completion of over 90 tailor-made projects, since our inception in 2008. Our commitment to simplifying life tasks has driven us to develop our own cutting-edge technologies while also strategically harnessing existing ones. By adeptly leveraging technology, whether proprietary or external, we continue to innovate and enhance the efficiency of various aspects of daily life

WE OFFER

SEAMLESS TEAM INTEGRATION AT ANY STAGE OF YOUR SDLC (SOFTWARE DEVELOPMENT LIFE CYCLE)

READY TO USE IoT SERVICES

https://www.iot-ignite.com/

Connectivity + BigData + Edge Compute

AI @ Edge

Hyper SCALE PLATFORM

ArCloud scalable platform layer portable on any IaaS platforms

SOFTWARE DEVELOPMENT

- Cloud native services development
- Mobile applications Android and iOS,
- Mobile IoT Services
- AI / ML applications and fine-tune service
- Blockchain / NFT services
- Intelligent Communication

MANAGED SERVICES

- Project Management
- Technology Consultancy
- CI / CD
- SLA based service hosting management

DEVELOPING PRODUCTS TOGETHER EITHER INTELLIGENT OPTIMIZATION OF PRE-DEVELOPED PRODUCS OR FULL-CYCLE PRODUCTIZATION

www.ardictech.com

OUR SOFTWARE EXPERTISE

An exceptionally skilled team prepared to exchange insights acquired from technology development across the United States, Europe, the Far East, and Asia

CLOUD BASED SOFTWARE DEVELOPMENT

General Purpose IoT and MOBILE IoT with EDGE COMPUTING

AI / ML

BLOCKCHAIN / NFT

INTELLIGENT COMMUNICATION

www.ardictech.com

OUR TECHNOLOGIES

Built with more than 300 years of collective global experience - $17 million investment from past revenues, grants and investments and **530,000-man-hour effort.**

PilarOS AFEX

Enhanced – Secure OS

Runs on Edge Gateways and Custom Mobile Devices. Hardened Android distro with extended security and manageability framework with over 1800 new APIs build on Android™ Open Source

Modiverse

Enterprise Grade Cloud-based Device Management, iOS, Android and Linux

ArCloud

Hyperscale Cloud Platform as a Service

IoTIgnite

IoT Platform with Edge Computing

Multi layered platform technology, enabling provisioning, management and automation of the connected devices over the air providing REST APIs for integration.

ArAi

AI / ML Platform,
AI at the Edge Compute,
NLP (Turkish Data Set),
Keyword Extraction,
Speech to Morphologic Analysis,
Object Recognition,
LLM model finetuning
Text to image fine tuned model

Blockchain

NFT, Multichain Wallet, NFT marketplace

Tokenizing the real world.

Quick NFT mint, NFT based campaign management, NFT based ticketing,...

ARCaaS

Intelligent Communications Platform

End to end secure A/V conferencing

Permanent rooms

Virtual Classroom

Unleash the potential of our tech team! We help you build a powerful products and technology with our skilled team members who collaborate seamlessly, all fueled by a shared vision of success. Our approach fosters a culture of open communication, strong leadership, and a commitment to tackling challenges together – the key ingredients for a team that consistently delivers outstanding results. We delivered more than 90 projects successfully.

IoT SOLUTIONS

write your relevant text here

MOBILE IoT

Our solution enables taking actions for security, safety and management of the devices on the move and turning mobile world into end-points that collects and process surrounding data. Combined with deep controlling capability of mobile devices, enables developing innovative solutions at ease.

INDUSTRIAL IoT

Our Digital Transformation Portfolio aims to deploy a paperless production on the factory sites. Smart MES goes beyond traditional MES functions like efficiency, quality, track and trace. It leverages data to enable lean manufacturing through Industrial Internet of Things (IIoT), insights and intelligence. By integrating data, machine learning, and predictive analytics, Smart MES transforms business operations and consolidates, aggregates, and transforms manufacturing data across the entire organization.
